

IntelleQt® Pro

Description

A cost-effective offline access control system for businesses and organizations, based on easy-to-program RFID technology, and featuring smart capabilities like audit trail and time schedules - without wiring or computer connections.

Function

Manages multiple door access, with a smart service card and encoded, contact-less electronic tags.

Applications

Access control for commercial and institutional facilities, including offices, hospitals, factories, schools and sports clubs

Features

- Offline system
- Easy to install
- Low cost
- Simple operation
- Controller & tags encoded through web-based software
- Easy to define authorizations
- Easy to delete and replace lost tags
- Encrypted data transmission between tag and reader
- Access zones and time schedules specified for every tag
- Up to 14,000 tags per controller
- 65,000 tags per system
- Event log lists 5,000 events

Specifications

- Contact-less tags
- RF reader antenna
- 13.56 MHz, MIFARE® RFID technology
- 2-4 cm read/write distance
- Software at <https://intelleqtpro.com>
- 12VDC

Surface mounted reader

Encoder

Controller and panel-mounted reader
