

Function

A CLIQ key with a transponder for electronic access control systems.

Allows users to conveniently use a single all-in-one key for opening both electromechanical cylinders and doors secured by RFID access control systems.

Applications

Facilitates installation and use of electromechanical platforms in apartment and office buildings, seniors' homes and other premises secured with RFID access control systems.

Recommended for new applications that combine a mechanical Mul-T-Lock platform, and an Interactive® CLIQ® system, with access control solutions, such as Mul-T-Lock's new IntelleQt® and IntelleQt® Pro.

Features

- Key head may incorporate round sticker transponders.
- Compatible with mechanical Mul-T-Lock platform Interactive, as well as the electromechanical Interactive CLIQ.
- Compatible with electronic RFID access control systems, such as Mul-T-Lock's IntelleQt and IntelleQt Pro.

Specifications

- Users can design their own SynerCLIQ cover sticker.
- Transponder dimensions: 22 mm diameter

Transponder
